

Use and customize Control Center on your iPhone and iPad

1

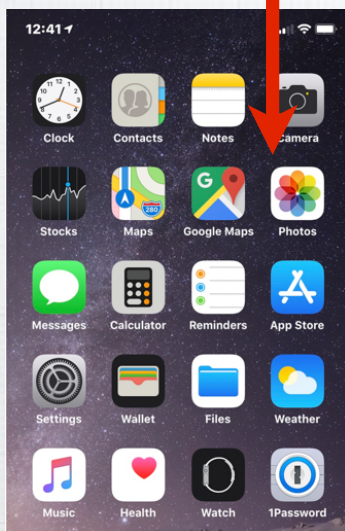

With Control Center, you can quickly take a picture, set a timer, control your Apple TV, and more.

2

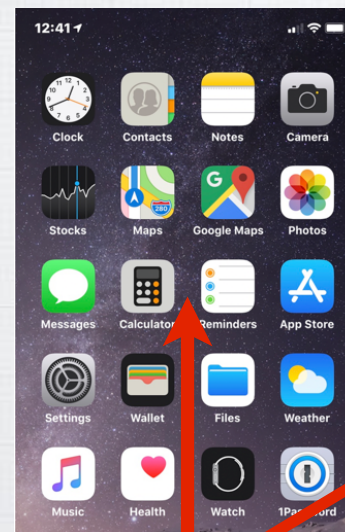

To open the Control Panel

on an iPhone X or later or iPad with the new iOS 12
Swipe down from top of the screen
(on the right side)

3

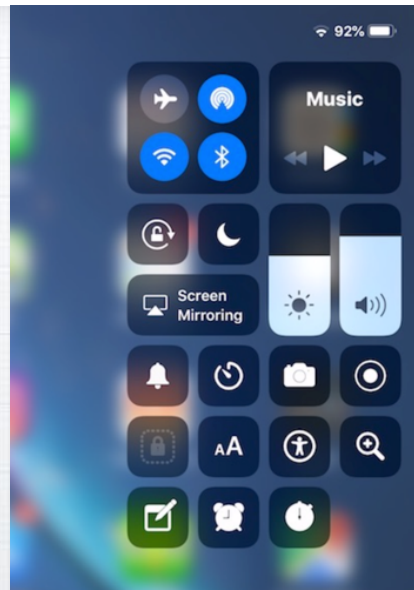

To open the Control Panel on an older* iPhone or iPad, Swipe up from the bottom of the screen.

*iPhone 8 or older or iPad with iOS 11

4

The Control Center can be a little bit overwhelming! Let's walk through all the sections - starting in the top left.

5

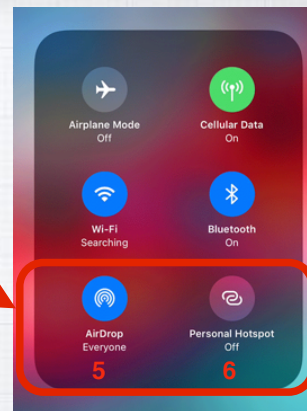

Network Settings

1. Airplane Mode - turns off all antennas.
2. Cellular Data - on/off (can still make calls).
3. WiFi - browse the web, stream music.
4. Bluetooth - Connect to headphones, car stereos and wireless keyboards.

6

Press and hold Network Settings to bring up two additional settings:

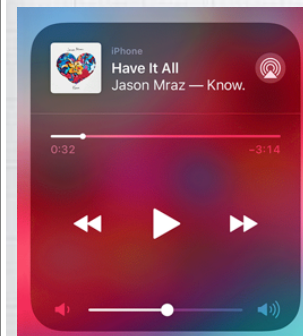

5. Airdrop - share your photos and files with other Apple devices nearby.
6. Personal Hotspot - allows your iPhone to provide cellular to an iPad.

7

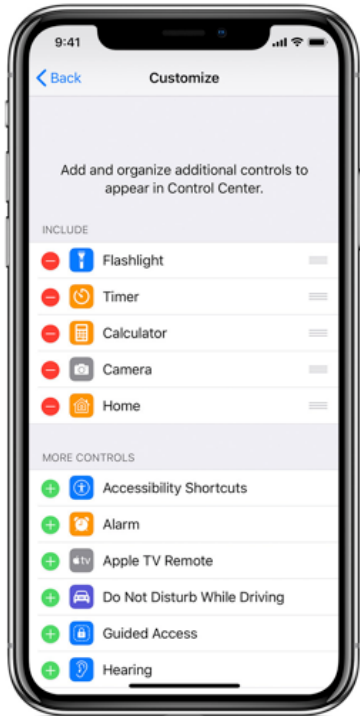

Audio Controls

Press and hold the audio card in the upper-right corner of Control Center to quickly play, pause, skip and control the volume of your favorite song or podcast - or switch the audio output.

8

To Customize

1. Go to Settings - Control Center.
2. Tap Customize Controls.
3. To add or remove controls, tap  or .

Let's review all the various options ...

9

Alarm

Alarm: Tap to [set an alarm](#) to wake up.

Brightness

Brightness: Drag the brightness control up or down to adjust the brightness of your display.

Calculator

Calculator: Use the standard calculator to quickly calculate numbers or rotate your device to use the scientific calculator for more advanced functions.

Do Not Disturb

Do Not Disturb: [Silence calls and notifications](#). Press and hold to turn on for an hour or until the end of the day. Or turn it on just for an event or while you're at a location, and it automatically turns off when the event ends or you leave that location.

Do Not Disturb While Driving

Do Not Disturb While Driving: [iPhone can sense when you might be driving and will silence calls, text messages, and notifications](#). People trying to reach you are notified that you're driving.

Wallet

Wallet: Quickly access cards for Apple Pay or boarding passes, movie tickets, and more.

10

Low Power Mode

Low Power Mode: Switch to [Low Power Mode](#) when your iPhone battery is low or when you don't have access to electrical power.

Magnifier

Magnifier: Turn your iPhone into a magnifying glass so you can zoom in on objects near you.

QR Code

Scan QR Code: [Use the built-in Camera on your iOS device to scan a QR Code](#) to quickly access websites without having to type or remember a web address.

Rotation Lock

Rotation Lock: Keep your screen from rotating when you move your device.

Silent Mode

Silent Mode: Quickly silence alerts and notifications that you receive on your device.

Stopwatch

Stopwatch: Measure the duration of an event and track lap times.

11

Text Size

Text Size: Tap, then drag the slider up or down to make the text on your device larger or smaller.

Voice Memo

Voice Memos: [Create a voice memo](#) with your device's built-in microphone.

Volume

Volume: Drag the volume control up or down to adjust the volume for any audio playback.

Accessibility Shortcuts

Accessibility Shortcuts: Quickly turn on accessibility features, like AssistiveTouch, Switch Control, VoiceOver, and more.

Apple TV Remote

Apple TV Remote: [Control your Apple TV 4K or Apple TV \(4th generation\)](#) with your iPhone, iPad, or iPod touch.

Camera

Camera: Quickly take a picture, a selfie, or record video.

12

Flashlight

Flashlight: * Turn the LED flash on your camera into a flashlight. Press deeply or press and hold the flashlight to adjust the brightness.

Hearing Aids

Hearing Aids: Pair or unpair your iPhone, iPad, or iPod touch with your hearing aids.

Home

Home: * If you set up accessories in the Home app, you can control your favorite home devices and scenes.

Night Shift

Night Shift: In the Brightness control, turn on Night Shift to adjust the colors in your display to the warmer end of the spectrum at night.

Notes

Notes: Quickly capture an idea, create a checklist, sketch, and more.

Screen Mirroring

Screen Mirroring: Stream music, photos, and video wirelessly to Apple TV and other AirPlay-enabled devices.

13

Screen Recording

Screen Recording: Tap to record your screen. Press deeply or press and hold Screen Recording and tap Microphone Audio to use your device's microphone to capture sound as you record.

Timer

Timer: Drag the slider up or down to set the duration of time, then tap Start.

True Tone

True Tone: * In the Brightness control, you can turn on True Tone to automatically adjust the color and intensity of your display to match the light in your environment.

14

Do Not Disturb

When you are in meetings it is always polite to 'silence' your iPhone.

The traditional way is to flip up the switch on the left side of your iPhone.

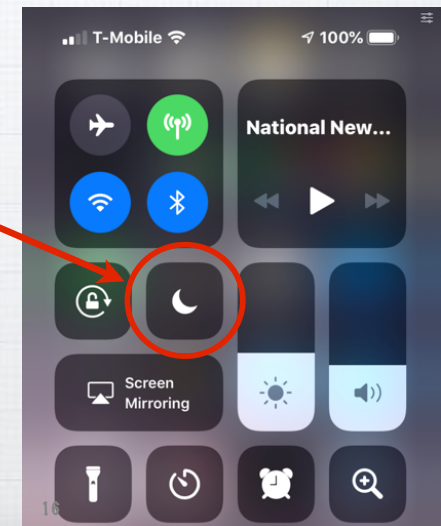

There is a better way!

15

Do Not Disturb

Tap to simply turn on or press and hold the 'half moon' to open the Do Not Disturb mode

16

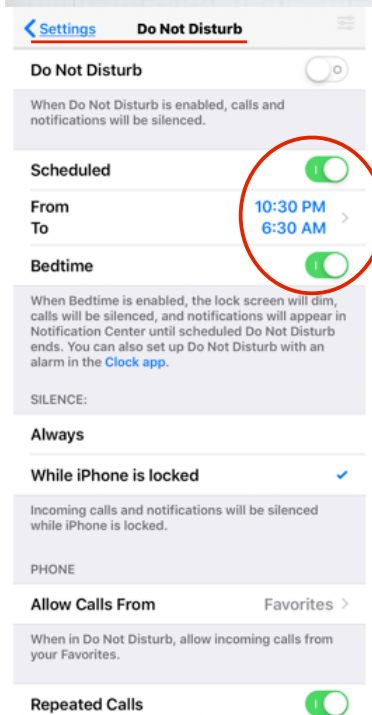

Now you have 3-4 choices. Chose 'Until I Leave This Location' or 'Until the End of this Event' if you have it in your calendar. No more forgetting to flip back that Silence switch!

17

You do need to adjust Settings/ Do Not Disturb. Set Silence to Always and phone to: Allow Calls From No One. I do leave Repeated Calls on for emergencies.

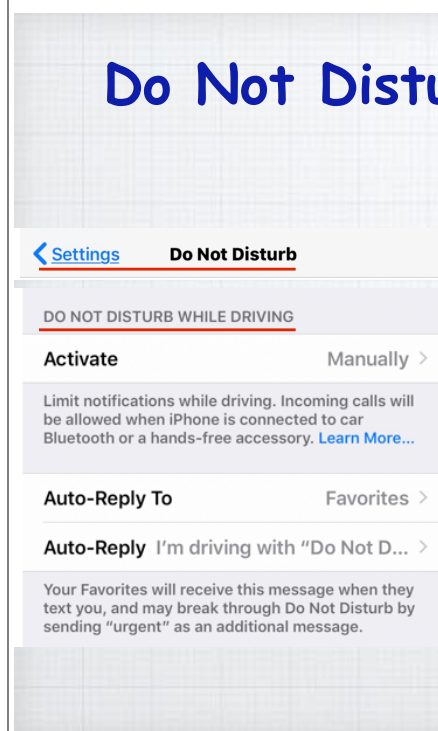

18

Do Not Disturb Settings Menu

There are lots more options in Settings. For example, I set up so my iPhone doesn't ring overnight except in emergencies.

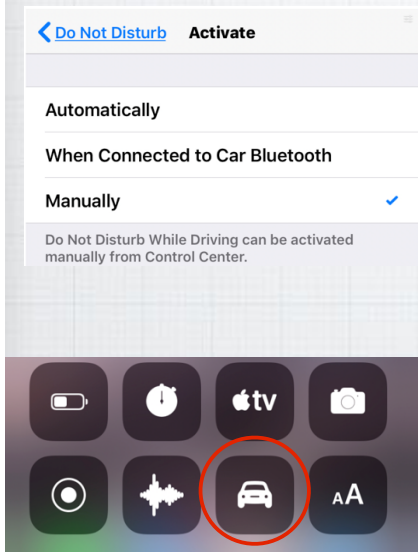

19

In Setting you can turn on: Do Not Disturb While Driving to help prevent the temptation of texting or talking on the phone while driving.

20

Do Not Disturb While Driving

You can activate it automatically (by speed), when connected to car's Bluetooth or manually by clicking the 'car' symbol in your Control Center.

(Add it in Settings/Control Center)
