

Do Not Disturb

When you are in meetings it is always polite to 'silence' your iPhone.

The traditional way is to flip up the switch on the left side of your iPhone.

There is a better way!

1

Use the Control Center

To open the Control Panel on an iPhone 8 or earlier model, Swipe up from the bottom of the screen

2

On an iPhone X in iOS 12

Swipe down from the top of the screen (on the right side)

to open the Control Panel

3

Control Panel

Press the 'half moon' to open the Do Not Disturb mode

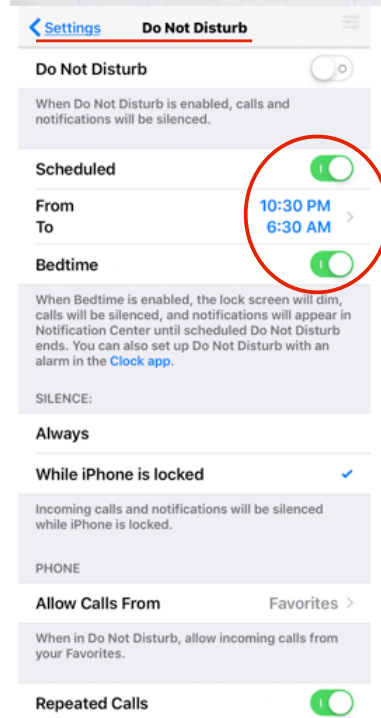

4

Now you have 3-4 choices. Chose 'Until I Leave This Location' or 'Until the End of this Event' if you have it in your calendar. No more forgetting to flip back that Silence switch!

5

Do Not Disturb Settings Menu

There are lots more options in Settings. For example, I set up so my iPhone doesn't ring overnight except in emergencies.

6

Do Not Disturb While Driving

In Setting you can turn on: Do Not Disturb While Driving to help prevent the temptation of texting or talking on the phone while driving.

7

Do Not Disturb While Driving

You can activate it automatically (by speed), when connected to car's Bluetooth or manually by clicking the 'car' symbol in your Control Center.

(Add it in Settings/Control Center)
