

## RMUG Summer Reading List

There aren't any RUMG meetings the next six months, so just like in Ninth Grade, we have a reading list for you this summer! Instead of Tale of Two Cities or Red Badge of Courage, your task will be to review some instructive websites and watch some videos on all things Apple.

The first website I would like to have you explore is one of Apple's own and it's a good one: [support.apple.com/explore/new-to-mac](https://support.apple.com/explore/new-to-mac)  
This starts you off nice and slow, as in 'new to Mac'. It gives lots of tips on getting more productive with your iMac or MacBook. The three buttons across the bottom (Mac Support, MacOS and Mac Basics) are also really good and lead to other great pages.

For help with your iPhone or iPad, visit Apple's support pages at: [support.apple.com/iphone](https://support.apple.com/iphone) and [support.apple.com/iphone](https://support.apple.com/iphone) to explore all the wonders of those small handheld computers. Be sure to click the links at the bottom of the webpages for the Users Guides: [support.apple.com/guide/ipad/welcome/ios](https://support.apple.com/guide/ipad/welcome/ios) and [support.apple.com/guide/iphone/welcome/ios](https://support.apple.com/guide/iphone/welcome/ios)

Apple's main support page: [support.apple.com](https://support.apple.com) has links to these pages plus many, many more for the Apple Watch, TV, Music, iCloud, Music, Apple ID, etc. Or click to get support via Email , Chat or at the Genius Bar. While at the Apple Store be sure to check out the "Today at Apple" - free group lessons on a variety of subjects from Photography to Music to Art & Design and Health & Fitness.

Rather kick back and watch some videos? Apple has a huge support page on YouTube with hundreds of short videos on all subjects. Visit: [www.youtube.com/channel/UCYFQ33UIPERYx8-ZHucZbDA/videos](https://www.youtube.com/channel/UCYFQ33UIPERYx8-ZHucZbDA/videos)

Speaking of video, I will remind you to visit David A. Cox's YouTube page at: [www.youtube.com/channel/UCWjgzVRdoEaZxiF\\_kVbrtsA](https://www.youtube.com/channel/UCWjgzVRdoEaZxiF_kVbrtsA) for excellent free lessons on anything Apple. We hope that David will be able to be back to work with us in person again next March!

To really bear down and get serious with some in depth training lessons on a huge variety of Apple subjects, I'd recommend you visit: <https://themacu.com> Not only can you get a seven day free trial for 'all access' to the huge library, I have negotiated a special 20% discount for our members from their regular \$20 annual membership. Just enter the code RMUG20 during ordering and their annual membership is yours for just \$16. Believe me there is plenty here to keep you busy all summer expanding your knowledge of the Apple world. And if you learn a few tricks you think the whole gang would like to learn, I welcome you to assist me with one of the RMUG classes next season!

OK, that is about it, now you are on your own. But don't worry, there will be no tests or pop quizzes when you come back! Have a great, safe summer and do continue to explore the wonderful Apple world!

Doug Lindal

Next Season's RMUG Schedule:

- November 12
- December 10
- January 14
- February 11
- March 10
- April 14
